EQUI-TREK®

THE ATOM

Revolutionary Lightweight 3,500kg Horsebox

ISO 9001:2008

0028

All Equi-Trek products
come with 1 Year FREE
Horse Recovery

SPECIFICATION

The unique lightweight Equi-Trek ATOM horsebox is constructed using a revolutionary composite fused panel with properties similar to that of carbon fibre. This incredibly impact-resistant material not only increases strength but is also extremely lightweight. The ATOM therefore provides a strong, durable and a safe environment in which to transport your horse. With a remarkable unladen weight from 2,100kg, it offers the highest potential payload for this size of horsebox on the market.

When owning a 3,500kg horsebox, it is vital that you know what the payload is, so that you can calculate whether it is capable of carrying one or two horses, all your equipment, yourself and your passengers.

Built on a brand new Peugeot chassis with a powerful 150BHP HDI diesel engine, the ATOM not only offers you the very largest payload but it is also extremely easy and economical to drive. Furthermore, the lower chassis height ensures the utmost stability.

Having been in development for over 2 years, you can rest assured that no compromise has been made on the safety and strength of the ATOM horsebox, which carries full European and VCA Type Approval. The full height reinforced bulkhead between the horse area and cabin ensures the utmost safety for the driver, passenger and horses. In addition the floor is constructed of a sturdy aluminium planked flooring which is covered with a hard wearing rubber matting.

The horse area is well equipped with two rear facing stalls; incorporating a dual-height, padded collapsible breast bar, all round windows for light and ventilation, and a fully adjustable partition. There is a choice of four layouts according to your personal preference, as well as many other optional extras detailed throughout this brochure.

Technical Data

Chassis

Brand new Peugeot chassis:

- 150BHP HDI diesel engine
- Euro 5 compliant
- Six speed gearbox
- Power steering
- Bluetooth®

Warranty

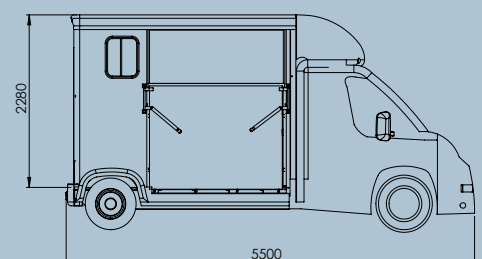

- 3 Years/100,000 miles Peugeot warranty
- 2 Years/unlimited mileage Equi-Trek warranty

Gross Weight

3,500kg

Unladen Weight

From 2,100kg

STANDARD FEATURES

Cab & Chassis

This brochure does not constitute an offer by Equi-Trek Limited. Some of the images shown in this brochure may show optional extras not included as standard. It is the policy of Equi-Trek Limited to seek to continually improve our vehicles in every way and so whilst every effort has been made to ensure the details set out in this brochure were correct at the time of going to press, we are unable to guarantee that no changes in specification have subsequently taken place. We therefore reserve the right to alter the specifications and price at any time without notice. Each vehicle is designed to optimise the horse carrying, seating and sleeping capabilities with a variety of potential configurations for our customers. It is the responsibility of the customer to select the proper combinations of loads and dimensions without exceeding the individual axle or gross weights of the vehicle. All unladen weights are quoted excluding the spare wheel, which is 30kg. Equi-Trek® is a registered trademark of Equi-Trek Limited.
